

PRUTHVI JOSHI

AI Platform Engineer | Full Stack Developer | IoT & Automation Specialist
+91 81280 57573 | pruthvijsh09@gmail.com | Bengaluru, Karnataka

PROFESSIONAL SUMMARY

Results-driven AI Platform Engineer and Full Stack Developer with experience building intelligent, scalable systems across Artificial Intelligence, Large Language Models (LLMs), Computer Vision, Automation, IoT, and Full Stack Development. Proven ability to deliver end-to-end AI-powered solutions, including a self-extensible AI assistant featuring real-time data processing, voice interaction, computer vision, automation, remote access, and autonomous task orchestration. Skilled in designing modular architectures, integrating advanced AI technologies, and developing innovative products that enhance productivity and user experience.

WORK EXPERIENCE

System Analyst — AI & Automation

Feb 2026 – Present

Foive Info Global Solutions | Bengaluru, Karnataka

- Architect and implement AI-driven automation pipelines using LLMs, prompt engineering, and agent orchestration frameworks to accelerate analytical workflows by 40%.
- Design end-to-end system architectures translating complex stakeholder requirements into functional specifications, reducing delivery timelines significantly.
- Lead gap analysis and root cause analysis initiatives, optimizing cross-functional processes and improving operational efficiency.
- Collaborate with engineering and product teams on solution design, testing, validation, and deployment for scalable AI systems.

Software Developer — AI, Blockchain & Full Stack

Feb 2022 – Aug 2024

Bhumitat Technologies | Gujarat

- Developed and tested scalable web interfaces for enterprise applications; handled backend API integration and cross-functional bug resolution.
- Built automated test suites using Selenium WebDriver and PyTest, improving test coverage and release stability.
- Supported the design and implementation of robust backend systems, reducing downtime and user complaints.
- Developed an AI-powered Voice Assistant System using Python and Artificial Intelligence technologies.
- Implemented Speech-to-Text and Neural Text-to-Speech modules for natural voice-based interaction.
- Integrated NLP, Large Language Models (LLMs), and API-based services to generate intelligent responses.

KEY PROJECTS

Multifunctional Self-Building AI Assistant | September 2025 – Present

- Developed an AI-powered Voice Assistant using Python, integrating NLP, Large Language Models (LLMs), Speech Recognition, and Neural Text-to-Speech for intelligent voice-based interactions.
- Built a modern PyQt5-based desktop application with real-time web search, contextual response generation, and a user-friendly graphical interface.
- Implemented automation, remote access/control, and computer vision functionalities using Flask and OpenCV for enhanced productivity and smart system management.
- Designed a scalable self-extensible architecture capable of dynamically adding new features through natural language instructions, supported by multithreading, API integrations, and modular development practices.

Gavedu – Blockchain-Powered Connectivity Platform

Contributed to the development, testing, and optimization of AI-driven and automation-based modules within Gavedu, a PM-WANI and blockchain-powered connectivity platform. Worked on API integration, system enhancement, feature validation, debugging, and platform performance optimization while supporting scalable digital infrastructure solutions.

Home Automation & Drone Navigation System

- IoT-based smart home automation with voice control integration and Python-driven drone navigation using sensor fusion.

Parking Management System (MERN Stack)

- Full-stack real-time parking management with role-based access, live slot tracking, JWT authentication, and REST API integration.

TECHNICAL SKILLS

AI / ML	LLMs, RAG, LangChain, LangGraph, LlamaIndex, Prompt Engineering, Agent Orchestration, Memory Architectures, TensorFlow, NLP, YOLOv8, Computer Vision
Languages	Python, JavaScript, TypeScript, C/C++, SQL
Full Stack	React, Node.js, Express, MongoDB (MERN), Flask, Django, FastAPI, REST APIs, Redux, React Router
IoT / Robotics	IoT System Design, Sensor Automation, Drone Navigation, Home Automation, Voice Control (STT/TTS)
Blockchain	Private Blockchain, Smart Contracts, Decentralized Apps, Tamper-proof Systems
Cloud / DevOps	AWS, Azure, GCP, Docker, Kubernetes, Git, PostgreSQL, Redis, MongoDB
Testing	Selenium WebDriver, PyTest, QA Automation, Model Validation
Research	BCI / Neurotechnology, EEG Signal Processing, Human-AI Interaction, Cognitive Computing

EDUCATION

Bachelor of Technology — Computer Science AD Patel Institute of Technology	2023 – 2026
Diploma — Information Technology Sir Bhavsinhji Polytechnic Institute	2020 – 2023

CERTIFICATIONS

- Micro1 Certified QA Automation Tester
- Microsoft Azure Certified Data Engineer
- Google Cybersecurity Certificate
- Google UX Design Certificate

RESEARCH & DEVELOPMENT INTERESTS

- Neurotechnology & Brain-Computer Interfaces (BCI) — EEG Signal Processing & Transcription
- Human-AI Interaction, Cognitive Computing & Augmented Intelligence
- Robotics, IoT & Autonomous Systems
- Computer Vision & Neural Signal Decoding
